

The SCCA is pleased to have partnered with one of our member groups, the [Sunshine Coast Community Solar Association](#) (SCCSA), with funding from the [Sunshine Coast Community Foundation](#), to support a feasibility study of building a community solar array co-operative here on the Coast. The project's goal is to further community participation in clean energy solutions, and to promote solar on the Sunshine Coast.

Thank you to those of you who recently participated in their community input survey! Stay tuned for the results of this study.

To find out more about the SCCSA and the Community Solar Array Investment project, [visit their website](#), and consider getting involved as a member. Click this link to read the March 2017 report "[Supporting Partnerships to Champion Community Solar on the Sunshine Coast](#)".
