***Rhododendron macrophyllum*** by David Moore

This native species of rhododendron is widespread along the coast of the Pacific Northwest from Washington to northern California, but is known in only a very few isolated sites in BC. This photo was taken on the slopes of Mt. Elphinstone, near Roberts Creek, in an area that is currently unprotected.

**Howe Sound** by Greg Lightbourne

**Tree Frog** by Rick O'Neill

The Pacific Tree Frog is one of many species that need forests and wetlands to survive. Amphibians are rapidly declining on a worldwide basis, and 2007 was declared the International Year of the Frog to draw attention to their plight. Amphibians in BC are threatened by habitat destruction from development, logging and mining, and they are also very susceptible to pollution due to absorption through their skin.

**Bush Tit** Photo ©2007 James Fiscus

This bushtit had fluffed up after a September dip in the bird bath. The bird was shot with a Canon 70-300mm lens, extended to 300mm, at 1/200sec. F 5.6. James Fiscus is a writer and photographer working in Portland, Oregon.
